

# Green Initiative

The very location of Life Science Products makes environmental considerations automatic. A few steps away from the warehouse you will find the beautiful Chesapeake Bay. When visiting, you will often hear the cry of the osprey or the call of wintering geese, and blue crabs- they speak for themselves! LSP treasures the area and actively works to conserve the environment, locally as well as globally through environmentally conscious products.

LSP has green initiatives build into it's operations in a variety of ways.

## Planning

- High value R insulation in buildings
- Automatic Thermostats
- Energy efficient appliances
- Conservative lighting fixtures and bulbs
- Fans in warehouses
- Diesel vehicles

## Purchasing

- Recycled content in office supplies
- Purchase of fuel efficient or alternative fuel vehicles

## Products

- Creation of "green" UV cured resin used in coatings and flooring systems that are LEED compliant
- Use of recycled material in metal crash rail systems

## Procedures

- Regular recycling of papers, ink cartridges, cans and other materials
- Use of E-mail and e-bill where possible
- Efficient planning for use of vehicles in delivery and crew transport
- Proper maintenance of vehicles and equipment
- Spill prevention and control
