

LSP® FRP Doors
by VATALAB

Doors • Frames • Protection Hardware

LSP® FRP Doors by VATALAB are engineered for protection—defending high-impact areas and supporting long-term performance in demanding life science, biomedical, healthcare, pharmaceutical and other environments. Our door system features integrated protection hardware along with VATALAB FiberShell™ and CleanCor™ technologies. With custom fabrication and a wide range of sizes, configurations, finishes, and mounting options, LSP provides tailored solutions to meet each project's specific requirements.

- **Fully-molded, seamless FRP construction**
- **High-use, long-term durability for harsh environments and cleaning protocols**
- **Integrated LSP protection hardware**
- **Purpose-built for the demands of critical facilities**
- **Made in the U.S.A.**

LSP™

Quality Solutions for Critical Environments

LSP® FRP Doors by VATALAB

Door Panel Construction

- 1-3/4" thick molded fiberglass (FiberShell™) exterior with CleanCor™ injected resin core
- Optional full perimeter stainless steel edge protection
- Four standard colors; custom colors available
- Built with a universal core with backing to support LSP's door protection hardware

Frame

- Available in stainless steel or molded fiberglass
- Stainless steel two-part frame with extended door stop
- Type 304/#4 finish standard; 316 stainless available
- Molded fiberglass frame available in 4″ depth
- Multiple installation and fastener options, including concealed fasteners

Vision Panels

- Stainless steel vision panel frames with various sizes and glazing options
- Double-flush vision panels with black ceramic border
- Optional double-flush vision panels with privacy blinds

Hardware & Automation

- Commercial-grade stainless hardware
- Electronic strikes and maglocks
- Interlocking system compatibility
- Factory-installed hardware for precise fit-up

Chemical & Corrosion Resistance

- Advantis FC
- Boost 3200/3201
- Boost FT
- Lift RT
- Principal
- SHC Extreme II
- Spor-Klenz®
- Ster-Bac Quat
- Vortexx

LSP Sani-Rail® Protection Hardware

- **Door Shields** are custom-sized protection designed to help shield door surfaces from repeated cart, cage and equipment contact. Available in aluminum or stainless steel.
- **Stainless Steel Jamb Guards** help protect vulnerable frame areas where repeated traffic can cause damage.
- **Handle Protectors** are purpose-built protection for one of the most exposed areas of a high-use door—the hardware zone. Available in aluminum or stainless steel.
- **Kick Plates** protect lower door surfaces exposed to carts, equipment and everyday traffic. Available in aluminum or stainless steel.

Warranty

- Lifetime guarantee against failure due to corrosion for fiberglass door panels and fiberglass frames; delamination of fiberglass from the stile and rail collar; and core expansion
- 10-year guarantee against failure due to materials and workmanship
- 5-year guarantee against failure due to corrosion for stainless steel frames in conditions named at the time of purchase

Why Facilities Specify LSP

- Engineered for hygienic performance in demanding, critical environments
- Custom fabrication means solutions are built around your facility
- Durable materials stand up to impact, cleaning and daily use
- LSP brings 50+ years of specialized industry experience
- Expert guidance supports your project from specification through installation
- Trusted by industry-leading companies nationwide
- One source for walls, flooring, doors, panels, crash rails, corner guards and more
